## GRAPHOLOGY SEMINAR

The lecture on Graphology was organized on the 29th of January, 2020 in the college. Prof. Sunil S. Sangve, HOD of Computer Engineering Department, explained the objectives of the workshop and also delivered the importance of Handwriting Analysis (Graphology).

Handwriting Analysis (Graphology) is an amazing science that helps students to understand and learn about themselves, as well as, others in a better way. By learning graphology one can become aware of their personality, real thinking pattern, behaviour, capabilities, strengths, weaknesses, relations (personal/professional), and much more through handwriting. Graphology and Grapho-therapy can help a person in educational, personal and professional life. Apart from that, it helps to improve concentration, goal orientation planning, and organization, relationships, behaviour, the health and wealth aspects also develop which helps positive thoughts to be instilled in the minds of the students that can help them overcome their fears.

Grapho-Therapy is a therapy given to a person to change his handwriting/signature and to minimize/remove the impact of any negative traits of his/her handwriting. This therapy involves the analysis of a person's handwriting, identification of the negative traits in their handwriting and provides the correct formation of alphabets in handwriting. Similarly, corrective formations in signatures are also suggested based on the handwriting therapy requirements. Grapho – Therapy cannot be considered as counselling. People get confused between counselling and therapy. Counselling is the advice given based on the Graph logical analysis of a person's behaviour, strengths, and weakness, etc. whereas therapy is provided to put correct handwriting style into practice.

Around 150 students and 10 faculties benefited from attending this workshop. The college expressed its gratitude to Mr. Sandip S. Arsude and his team for addressing the audience and delivering valuable content for this workshop. Later on, the expression of gratitude was further extended to include the Management, Principal, HOD, all the teaching staff, non-teaching staff and the students of the computer department for all the help they had extended in successfully organizing this workshop.

## Gender Sensitization Workshop

Even in the 21<sup>st</sup> century, women have not been given enough opportunities to feel empowered or independent. There are many young girls even today, who are scared to ask their basic rights. After observing this, our college principal decided to bring in awareness starting with the students of our college. Thus, our college conducted a Gender Sensitization programme with "Population First". Population first is a Mumbai based NGO, since its inception in 2002, this organisation has worked tirelessly to bring empowerment to women who comprise of the 50% of the population. The Laadli initiative is supported by UNFPA and sensitizes media professionals and media students about women rights. This was a two day workshop conducted on the 22<sup>nd</sup> and 23<sup>rd</sup> of September and the students were taught about various rights for women. They were also asked to perform some activities. There was a question and answer round which enabled students to clear their doubts about the subject. On the second day of workshop students were shown few short films which displayed various crisis and problems faced by women. There was a play which was shown and they were asked to perform on the spot plays to see how much knowledge the girls have gained from the workshop. The students were provided with light refreshments and lunch on both the days. This was indeed a fun filled experience

## Women's Health Hygiene Workshop

Even when India has progressed so much, women's health is a concern which is still neglected and not spoken of. Keeping this in mind, a workshop called Women's Health Hygiene was conducted for students on 7<sup>th</sup> July. The main motto behind this workshop was to make the girls understand that with proper health care, they can live a healthy life. Many girls are shy of discussing grave problems related to menstruation and other physical health. When women don't open up about their problems from the very beginning, they lead to bigger issues which are often life threatening. This was the reason, the workshop was conducted in order to bring about awareness among the young girls

about themselves and their physical health. Topics like basic hygiene, menstruation, cervical cancer, breast cancer were covered in the workshop. Few guidelines regarding the symptoms were also mentioned to the students for the sole purpose of awareness. Many girls had problems of menstruation which was addressed and proper solutions were given. Those having severe issues were asked to visit the gynaecologist. Many students also asked their queries and got them resolved which indeed turned out to be a successful and an interactive event with girls having more knowledge and awareness about themselves.
